Projects

Django E-commerce Website

- Developed a fully functional e-commerce website using Django framework.
- Implemented user authentication, product listings, and shopping cart functionality.
- Utilized Django ORM for database interactions.

Data Analysis and Visualization Dashboard

- Conducted data analysis on a real-world dataset using Pandas and NumPy.
- Created interactive visualizations using Matplotlib and Seaborn.
- Presented insights through a user-friendly dashboard.

Image Classification using YOLOv8

- Implemented a CNN model using TensorFlow and Keras for image classification.
- Trained the model on a dataset and achieved accurate predictions.
- Explored transfer learning techniques for improved performance.

Extracurricular Activities

Participated in SoFTEC from Fast university Lahore, TechnoCon from University of Central Punjab and UTS 3.0 from University of Technology Lahore coding competitions.
